Tech Tip #46

Tech Tip for Aeris SmartSense® Label Change.

Label change notification for AERIS SmartSense system to easily locate the right wheel end position during the ¼” DOT tubing installation into the control box.

- LR => ROAD REAR = locates the rear axle in roadside
- LF => ROAD FRONT = locates the front axle in roadside
- RF => CURB FRONT = locates the front axle in curbside
- RR => CURB REAR = locates the rear axle in curbside

Note: This is applicable to AERIS tire inflation system with the SmartSense option only.

Please contact your STEMCO sales representative with questions or concerns.
