WHEEL SEALS

EXPERIENCE THE STEMCO[®] DIFFERENCE.

Through world-class manufacturing and engineering of fleet-tested, innovative wheel end products like our industry-leading seals, we create exceptional customer experiences. Customers turn to us because STEMCO puts safety first.

OUR PRODUCTS ARE

- Designed using our 70+ years of experience in the seals industry to last longer, perform exceptionally and save money
- 100% consistent, containing the exact same steel and rubber formulations in every seal we build
- Made and distributed completely in the U.S.A.
- OEM certified
- Backed by warranties and a lifetime of support

Signed. Sealed. Delivered.

For more than 70 years, STEMCO has provided the commercial vehicle industry with reliable wheel seals. Our promise is to deliver tougher, longer-life seals that meet the performance and design requirements for any fleet. Plus, your experience doesn't stop at the sale. When you purchase STEMCO seals, you're signing on for a lifetime of support, industry-leading warranties, and the delivery of terrific customer service should you need us.

- 40+ people available for customer support
- 7-year warranty on OEM available based on spec
- 5-year warranty available in aftermarket

WHY STEMCO SEALS?

NO SEALANT NEEDED

A seal should be installed on a clean spindle shoulder without additional sealant, which hinders the performance of the seal. STEMCO seals are specifically designed and developed to be used without sealant.

100% MADE IN THE U.S.A.

From design and engineering to every step of production, our seals are 100% made in the U.S.A. in our Longview, Texas facility. In addition, 100% of the steel and components are sourced in the U.S.A. Zero percent of our seals are manufactured by a third party and imported under our brand.

LONGEVITY WE STAND BY

STEMCO products outlast the competition. Through strict quality control processes, we deliver industry-leading performance backed with industry-leading OEM (7 years available) and aftermarket (5 years available) warranty packages.

CONFIDENT, ACCURATE INSTALLATION

Installing STEMCO seals requires a specific STEMCO tool that ensures an easy and square installation every time. Testing has shown that any seal installed by hand or by blunt force can compromise the life of the seal or even cause wheel end damage.

OEM CERTIFIED

Our products are highly sought after. In fact, STEMCO is certified as the original seal on many brand-name vehicles.

The STEMCO Wheel Seal Product Line

We've engineered a host of sealing options designed to meet the varying demands and expectations of each fleet to maximize performance and value.

Discover® XR

High-performance with patented GlideLock™ technology. The most advanced wheel seal available.

- Multi-labyrinth sealing design great for long-life applications

Grit Guard®

Exceptional performance, durability and contaminant exclusion in severe service applications.

- Remains flexible even in grueling conditions and temperatures beyond -40°F

Guardian®

Helps prevent leading causes of seal-life degradation – contamination ingress and heat generation.

- Made to handle high heat and rugged environments

Voyager®

A great choice for fleets seeking a superior seal for everyday stop-and-go traffic environments.

- Well suited for city traffic and regional route trucks
